

Testing & Evaluation Checklist (All Verified)

A. Environment for Checks

- **Verified** — Used provided sample accounts (admin1, inst1, stu1, stu2).
 - **Verified** — Used seed data from setup scripts.
-

B. Acceptance Tests

Login & Roles

- **Verified** — Wrong password is rejected with correct error message.
- **Verified** — Dashboard matches the logged-in user's role.

Student

- **Verified** — Catalog shows correct course details (code/title/credits/capacity/instructor).
- **Verified** — Register in a section with available seats → success + appears in "My Registrations" + timetable.
- **Verified** — Re-registering the same section is blocked with a clear message.
- **Verified** — Registering in full section is blocked with "Section full."
- **Verified** — Drop before deadline works.
- **Verified** — View grades for registered courses.
- **Verified** — Transcript export (CSV/PDF) works.

Instructor

- **Verified** — Only their own sections are visible.
- **Verified** — Score entry (quiz/midterm/end-sem) saves correctly.
- **Verified** — Final grade computation matches formula.
- **Verified** — Editing another instructor's section is blocked.

Admin

- **Verified** — Create new student user (Auth DB + ERP DB).
- **Verified** — Create course + section, assign instructor.
- **Verified** — Maintenance ON → banner shows; student/instructor actions blocked.
- **Verified** — Maintenance OFF → normal behavior restored.

Password & Auth Separation

- **Verified** — Password hash stored in Auth DB only.
- **Verified** — ERP DB has no passwords.
- **Verified** — Login uses Auth DB + loads profile from ERP DB.

Exports

- **Verified** — Transcript or grade CSV export works.

C. Edge & Negative Tests

- **Verified** — Capacity cannot be negative or nonsensical.
- **Verified** — Register/drop after deadline is blocked.

- **Verified** — Student cannot access or modify another student's data.
 - **Verified** — Instructor cannot grade students from another section.
 - **Verified** — Maintenance ON blocks all student/instructor changes globally.
-

D. Data Integrity Checks

- **Verified** — Duplicate enrollments (student+section) prevented.
 - **Verified** — Section removal blocked if students are enrolled, with a clear message.
(Message was displayed as #(Number of Students) are currently enrolled in this section so deletion is not allowed)
-

E. Security Basics

- **Verified** — Only password hashes stored, not real passwords.
 - **Verified** — Change Password dialog exists (bonus).
 - **Not Implemented** — Temporary lock or warning after 5 failed logins (bonus).
 - **Verified** — Access rules checked before every modifying action.
-

F. UI/UX Checks

- **Verified** — Labels/buttons are clear, messages friendly.
 - **Verified** — Tables used for lists; sorting/filtering works (Added in each tables inside UI).
 - **Verified** — Long actions show a “please wait” dialog.
-

G. Performance Sanity

- **Verified** — Catalog (~100 courses) loads quickly.
 - **Verified** — App starts without freezes or crashes.
-

H. Maintenance & Backup/Restore

- **Verified** — Maintenance toggle updates flag + shows banner immediately.
- **Verified** — All writes blocked for student/instructor when ON.
- **Verified** — Backup/restore reverts DB correctly (bonus).
